THE LEADING MAGAZINE FOR ENDOCRINOLOGISTS

Endocrine news

Parallel Protocols:

TREATING DIABETES AND HIV/AIDS

As HIV-positive patients live longer, their risk for developing diabetes has increased along with their lifespans. Treating both conditions concurrently is challenging, but as with any other patient, lifestyle modification is a crucial component.

THE GREAT DEBATE:

Menopausal hormone replacement therapy

FATAL ERRORS:

Reducing medical mistakes through technology upgrades and policy changes
